

Help file

Welcome to UI Kit Wireframe.

This file is an Adobe XD file and included many templates for your wireframing.

The best practice for used this file

- Open **UI Kit Wireframe.xd** or create a new project and import elements of you need.
- This file is composed per types of elements
 - Header
 - Content
 - Features
 - Footer
- All layers are well-organized
- Use the components, colours and title on the left sidebar
- To change a color on all the elements change the value color in the left bar in assets
- If you need to modify a component this is the best way :
 - Select a component
 - Click right on your component
 - Select “edit master component” and edit
- Once you all of modification are finished, save the file

For more information for use Adobe XD follow the user guide of Adobe XD :
